**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Lodhie (US Pat. No 6,193,392).

Regarding claim 1, the applicant is advised that claims have been given their broadest reasonable interpretation. In re Pearson, 181 USPQ 641 (CCPA 1974), Lodhie discloses a light source substrate (40, fig. 4) adopted for a backlight module (display machine), and comprising: a printed circuit board (40, fig. 4, col. 4, line 3), a lighting assembly disposed (LEDs 31) on the printed circuit board, and a reflection (50, fig. 4, line 18) member arranged on a predetermined surface, from which light emits, of the printed circuit board, whereby the reflection member reflects the light to the backlight module.

Regarding claim 2, Lodhie further discloses that the printed circuit board is a dark-colored plate (opaque, col. 4, line 19).

Regarding claim 3, Lodhie further discloses that the reflection member is a light-colored, rectangular shaped sheet (fig. 4, col. 4, lines 18-20).

Regarding claim 4, Lodhie further discloses that the lighting assembly includes a plurality of LEDS (31, fig. 4, line 2) and resistors (46, fig. 4, col. 4, line 11) arranged on the printed circuit board in an alternate relationship and two electrical wires respectively connecting two opposing ends of the printed circuit board (fig. 4).

Regarding claim 5, Lodhie further discloses that the reflection member has a plurality of recesses (53, fig. 4) formed thereon and respectively corresponding to the LEDS.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hara et al (US 2003/0227768) discloses a backlight module including a light guide 50, a plurality of LEDs 31, a reflector 36 in figure 3A.
